Professional Summary

Industrial engineer and hands-on website builder who designs and ships business sites end-to-end — layout, copy, build, launch, analytics. Founder of **Wolfim Studio**, an AI-assisted web studio where I design every page myself and run an **AI generates → AI audits → human approves** delivery pipeline. I build fast because small businesses need a site this week, not next month — and I design for the phone call, not the award.

Design & Build Skills

Web Design & Layout

Responsive page design, hero-offer-proof structure, typography and spacing systems. Templates and section libraries for fast builds.

Website Building

Astro, Next.js, HTML/CSS/JS, CMS-style content structure. Published production sites for real estate, commercial and product clients.

Copy Polish

Writes and polishes site copy from thin source material — transcripts, reviews, old sites — and turns it into clear service and proof sections.

Photo Handling

Batch corrections, cropping for layout slots, visual QA before launch. Knows when a photo carries the page and must be hand-fixed.

Conversion & Contact Paths

Analytics & Measurement

Clear offers, phone-first CTAs, WhatsApp and form integration. Every section answers: who calls, and why now.

GA4 setup and monthly client reporting. Diagnoses traffic-without-calls with data instead of redesigning by guess.

AI-Assisted Workflow

AI drafts and audits content and code; I make the final call. Multi-agent quality gates with documented acceptance criteria.

Commercial Judgment

Managed procurement and B2B operations for years — understands cost, urgency and what clients actually pay for.

Experience & Projects

Wolfim — Founder & Lead Designer

Design · Build · Delivery 2025 – Present

AI-assisted web studio. I design, build and ship client websites myself, with an independent AI audit step before every launch.

- Designed and built the agency site **wolfim.com** and three production client sites (see Live Projects).
- Ran an automated client outreach pipeline that processed **122+ qualified leads** with AI-assisted tagging.
- Integrated WhatsApp (YCloud API), GA4 analytics and CMS workflows into client sites.
- Built a lead-generation ecosystem using web scraping, enrichment and structured databases.

Astro

YCloud API

Make.com

Python

Farias & Asociados — Real Estate Agency Site

Designer & Builder 2026

Designed and shipped a live real-estate site currently serving a production client.

- Property listings with individual pages, WhatsApp contact and lead capture.
- Client reviews integrated as social proof.

fariasyasociados.com.ar

Cloudinary

GA4

Roggero & Roma — Real Estate Portal

Designer & Builder 2026

Designed and shipped a production real-estate portal currently serving a live client.

- Searchable property catalog with individual listing pages, filters and contact paths.
- CRM integration and VPS backup system.

— Monthly GA4 reporting delivered to the client.

Supabase

Korantis — Venue Intelligence Product

Founder · Product & Data Pipeline 2025 – Present

Designed a venue-discovery product with an AI evaluation pipeline (text pre-screen + vision scoring).

- Two-stage model architecture cut vision API calls by **83.3%**.
- Curated and labeled **25+ Buenos Aires venues** with defined quality thresholds.

ANGO Metalúrgica — Commercial & Imports Manager

B2B · China–Argentina Imports 2024 – Present

Managed international suppliers, imports, logistics and B2B commercial development; contributed to a reported 30% sales increase in the first operating year.

Fábrica Militar Río Tercero — Head of Procurement & Logistics

Operations · Leadership · KPI Management 2016 – 2024

Managed an approximately USD 4M annual procurement budget, led a 6-person core team (19 during the Procurement + Logistics integration), and contributed to a reported 15% reduction in acquisition cycle time.

Live Projects

fariasyasociados.com.ar

Real estate agency site — live client, property listings, WhatsApp contact

roggeroyroma.com

Production property portal — catalog, CRM integration, analytics
wolfim-motors.vercel.app Automotive dealer platform — inventory, unit pages, per-unit contact
wolfim.com Agency site — services, process and portfolio
korantis.com Venue-discovery product with AI evaluation pipeline
lamontaña.lat Commercial web project

Technical Skills

Web Build	Astro, Next.js, Webflow (basics), HTML/CSS/JS, Supabase, Cloudflare, Git, Vercel
Design Tools	Figma, Canva
AI Tools	Claude, ChatGPT, DeepSeek — plus a custom multi-agent QA setup with documented rubrics
Data & Automation	Python, Make.com, web scraping & enrichment, cron automation
Business Tools	Excel (advanced), SAP, Notion, Google Workspace, GA4

Languages

Spanish	NATIVE	Full professional proficiency in all contexts.
English	B2	Working daily in English — technical documentation, client-facing writing, voice conversations.
Portuguese	BASIC	Reading comprehension.

Education

Industrial Engineer

Engineering foundation in process optimization, quality control, statistical analysis and structured evaluation — the same discipline applied to every build.

Why I’m a Strong Fit as a Website Builder

01

Hands-on Builder

I design and build the pages myself — from blank layout to launch. Templates and libraries when they help, custom work when the client needs it.

03

Evidence Over Opinion

GA4 and call tracking decide what gets fixed after launch — traffic reading without conversions gets one targeted change, measured for two weeks.

05

Business Judgment

Ran procurement and commercial operations for almost a decade — I design for the phone call and the payback, not for the design award.

02

Built for Speed

Reusable section system plus a documented pre-launch checklist: alt text, phone number vs CRM, mobile hero crop. Same fixes never happen twice.

04

AI With Human Gates

AI drafts and audits; I approve. Clients get the speed of automation without the quality roulette of unverified output.

06

Remote Discipline

Operating distributed systems daily: async updates, documented workflows, deadlines met without supervision.
